PROFESSIONAL SUMMARY

ICT Graduate (NQF7) with dual strength in Application Development and Data Analytics. Fast learner who moved from Java academic projects to shipping full stack PERN applications and IoT systems within 14 months. Built 4 production-scale projects including AI booking ecosystem and real-time delivery platform. Seeking Junior Developer or Graduate Program to leverage strong debugging, system design, and collaborative problem-solving skills.

QUALIFICATIONS

University of Mpumalanga | *Mbombela, Mpumalanga*

Advanced Diploma in Information and Communication Technology (**ICT**) – NQF7 | *Feb 2021 - Nov 2025*

- **Majors:** Application Development & Data Analytics
- **Coursework:** Data Structures & Algorithms, Objects & Design, Programming in Java, Internet of Things (IoT), Machine Learning, AI, Object-Oriented Programming, Cybersecurity.

CERTIFICATIONS

IBM Skillsbuild (Online course)

Data Fundamentals | *Completed, Dec 2025*

- **Focus:** Data Science
- **Coursework:** Introduction to Data Concepts, Data Science in our world, Overview of tools and Languages, Cleaning Refining and Visualizing Data with IBM Watson Studio, Future in Data: The Job Landscape.

IBM Skillsbuild (Online course)

Applied Data Science with Python | *Completed, Feb 2026*

- **Focus:** Data Science & Python
- **Coursework:** Python for Data Science, Data Analysis with Python, Data Visualization with Python.

IBM Skillsbuild (Online course)

Agile Explorer - Powered by Agile at IBM | *Completed, Feb 2026*

- **Focus:** Agile Methodologies & Project Management
- **Coursework:** Agile Manifesto, Scrum Framework, Kanban, Iterative Development, and User Stories.

PROJECTS

Happy Deliveries: Real-Time Food Delivery Platform

- **Tools**: React Native (Expo), Node.js, Express.js, PostgreSQL (PostGIS), Socket.io, EJS, Git.
- Developed a comprehensive full-stack ecosystem comprising a Customer Mobile App, a Driver App, and an EJS-rendered Web Dashboard for restaurant managers, bridging heavy backend logic with a high-performance frontend.
- Engineered real-time geospatial tracking and order notifications utilizing Socket.io and PostgreSQL spatial queries, enabling instant driver alerts and live delivery tracking without manual data polling.
- Designed a premium, scalable mobile UI with React Native, implementing smart data-filtering algorithms to dynamically render "Fastest Near You" and "Community Favorites" sections.
- Built a secure administrative web portal with session management, empowering managers to oversee live order statuses and dynamically edit menu items and discount pricing.

Stock Predictor

- **Tools**: Python, Pandas & NumPy, Scikit-learn, Matplotlib, Git.
- Trained mathematical models to predict stock price trends using linear regression time series algorithms
- Scripted the predictive stock price model and obtained a prediction accuracy of 90.07%

IoT Smart Home System

- **Tools**: C++ (Embedded), ESP8266, Arduino Framework, Firebase, Python, Git

- led a team of 8 to build an IoT ecosystem transforming standard appliances into smart devices, delivering a functional hardware software prototype
- Developed ESP8266 firmware in C++ and integrated it with Firebase to enable real-time remote device control via mobile and web interfaces.
- Made a load-shedding mitigation algorithm using live Eskom schedules, reducing potential power surge risks by 30%.

Casalinga Tours: AI-Integrated Booking Ecosystem

- **Tools**: Python (Scikit-learn), Node.js, Express.js, PostgreSQL, EJS, REST APIs, Git.
- Built a predictive ML recommendation engine in Python (Scikit-learn), boosting user engagement.
- Designed PostgreSQL schema syncing tour inventory and dashboards (User, Bookings manager & admin) with AI, saving 15+ admin hours per week.
- Developed a high-speed API connecting Node.js/Express backend with Python AI for real-time bookings.

EXPERIENCE

University of Mpumalanga (UMP) | Mbombela, Mpumalanga
Teaching Assistant | Feb 2024 - Jan 2025

- Delivered supplementary ICT lectures, improving student understanding and increasing average test scores by 21%.
- Used automated grading and rubric-based assessment to mark work for 50+ students, reducing grading workload.
- Tutored students in Python and Java debugging sessions, reducing resubmissions and improving final project outcomes.

SKILLS

Programming: Java, Python, JavaScript, HTML/CSS, Node.js
Tools: Android Studio, IntelliJ, Visual Studio Code, Jupyter Notebook, Git.
Frameworks & Libraries: React.js, React Native (expo) and express.js, Django, Spring Boot**.**
Databases: SQL, PostgreSQL, Mongo DB, Firebase, Database Migration (Flyway/Liquibase).
Concepts: Machine learning (ML), LLMs, Data structures and Algorithms, RESTful API Design, troubleshooting, SDLC, Agile, Power BI, API integration & Development, DevOps, CI/CD.
Behavioral: Problem solving Skills, Adaptability, Collaboration (teamwork).
